Projects

–Final Year Project [React JS, Node js, Firebase Database]

Project Title: Smart Journey

Discover the beauty of Pakistan's cities with our tourism platform, where you can explore attractions, accommodations, and local experiences.

–Hotel Management System [.Net, c#]

Our hotel management system simplifies operations by enabling efficient CRUD functionality for managing city-specific hotel data.

–School Management System [Documentation]

Developing a detailed documentation blueprint for a school management system, outlining all necessary features and workflows. This documentation serves as a foundational guide for future implementation.
